

◆ SERVICE INFORMATION UPDATE — 2008 ◆

**CORPORATE  
OVERVIEW**

Buys & Associates, Inc. is an environmental, health and safety consulting firm specializing in evaluating and resolving issues associated with regulatory compliance; incident investigation and prevention; and employee work conditions.

B&A realizes that time and accuracy can make or break a project. Our approach is to evaluate problems that either the client, the agency, or we have identified and then design and implement a program with cost-effective solutions.

Buys & Associates' Certified Industrial Hygienists, Certified Safety Professionals and other environmental, health and safety professionals provide a unique blend of technical experience and regulatory knowledge. We allow you to continue with your regular duties with the confidence that you have someone to rely on for your environmental, health and safety needs.

# Buys & Associates, Inc. Health & Safety Team

---

## **MARTIN BUYS, President & Principal-in-Charge**

Marty Buys has more than 30 years of management experience in the environmental consulting industry. As President of Buys & Associates, he manages numerous Regulatory, NEPA, and Health & Safety projects throughout the Rocky Mountain Region and beyond. Given Marty's long-term experience and expertise, he fully understands how development affects public land uses, as well as how numerous industries are affected by public land management decisions and how these issues impact planning and approvals of time-sensitive projects.

## **JEFF CITRONE, Health & Safety Manager**

Jeff Citrone has a distinguished career in health and safety with over 28 years of experience. Jeff is a Certified Industrial Hygienist and Certified Safety Professional, as well as a Registered Environmental Scientist in the State of Colorado and a Registered Geologist in the State of Wyoming. He has an extensive background in health and safety management including, but not limited to: noise assessment, remediation, health and safety policies, risk management programs, industrial hygiene and indoor air quality.

## **HUGH GARRISON, Health & Safety Specialist**

Hugh Garrison joins Buys & Associates with eight years of experience in the health and safety industry and an extensive background in environmental projects for the petrochemical industry. Hugh is a Certified Safety Professional and a Registered Environmental Scientist in the State of Colorado with a varied background in: groundwater contamination, ecological risk assessment methodologies, exposure assessment of refinery workers, natural resource management and environmental ethics.

## **ROGER KNIGHT, Health & Safety Specialist**

Roger Knight contributes a breadth of regulatory and health and safety management knowledge to the Health & Safety-team of experts. Roger is a Certified Professional Environmental Scientist, Asbestos Inspector and Air Monitoring Specialist in the State of Colorado. In addition, he has managed numerous projects and produced timely, accurate and affordable results.

## **KIM KURCZEWSKI, Technical Writer**

Kim Kurczewski has numerous years of experience in health and safety programs, environmental compliance, employee training, hazardous materials and hazardous waste management, technical specification writing, and project and process engineering. In addition, Kim has current certifications in HAZWOPER and a Certificate of Hazardous Materials Management.

## **GREG DERANLEAU, Senior Environmental Scientist**

Greg Deranleau has more than 10 years of professional experience managing environmental consulting, construction, and engineering projects. He has served in various capacities on numerous projects, with expertise in health and safety oversight and project management. Greg's most recent focus has been designing and constructing evaporation pits.

## **LYNNA SCRANTON, Environmental Scientist**

Lynna Scranton has extensive experience with a wide variety of environmental regulatory compliance activities, including: the provision of pipeline services; due diligence investigations; environmental investigations that include contaminant impact and delineation assessments; health & safety program audits and implementation, phase I & II investigations; emergency response; and preparation and review of permits, flow mapping and more.
