- NPDES Permitting
- Stormwater Management Master Planning
- Erosion & sediment control designs
- Local, State and EPA Liaison
- Large-scale Field Project Management
- Remediation, Environmental Assessment
- Quality Assurance and Quality Control

EXPERIENCE

John Jehn joined Buys & Associates in 2007 and currently manages the Stormwater Management, Quality Assurance and Quality Control program. He has over twenty two years of professional experience and has earned a stellar reputation as a geologist with experience in the fields of environmental science, remediation, geotechnics and construction. John is a professional geologist in the state of Wyoming and Tennessee and serves as Vice President of the Jefferson County Department of Public Health & Environment board.

John has proven throughout the course of his career to be an expert in Stormwater Management, from erosion control design to state permitting and construction compliance. He is well versed in the rules and regulations associated with the National Pollutant Discharge Elimination System (NPDES), and all aspects of Phase I and Phase II of the Clean Water Act (CWA). John has also produced a dynamic certification training course on Stormwater Management and Erosion Control for the construction and oil and gas industries.

John has proven to be exceptional communicator and is skilled in negotiating with government agencies, often resulting in decreased fines and penalties for the client. His seminars have familiarized countless clients with the rules and regulations associated with Stormwater runoff and helped them attain and maintain compliance.
