

*“Smart People
Solving Problems”*

Buys & Associates, Inc. is an environmental consulting firm that specializes in defining and resolving your environmental issues.

B&A realizes that time and accuracy can make or break a project. Our approach is to evaluate problems that either the client, the agency, or we have identified and then design and implement a program with cost-effective solutions.

B&A biologists, geologists, paleontologists, archaeologists, NEPA experts, and other specialists provide a unique blend of technical expertise and regulatory knowledge. We understand how to approach even the most difficult projects. With our knowledge of regulatory requirements, you can count on us for practical and appropriate solutions to your environmental needs.

Phase I & II Services

Under current state and federal environmental regulations, a property owner may be held liable for previous hazardous materials management or disposal practices, regardless of the property's owner's knowledge or participation in those practices. In order to establish the potential impact of this liability, an **Environmental Site Assessment (ESA)** is typically performed on a property. These ESAs are usually defined as a **Phase I ESA**, i.e., one conducted to identify potential environmental conditions without intrusive or sampling activities; or a **Phase II ESA**, i.e., an assessment that includes intrusive or sampling activities to evaluate the nature and possible extent of the environmental conditions.

Undeveloped property with a transformer

Phase I and Phase II (ESAs) are performed for a number of reasons:

- All Appropriate Inquiry (AAI) prior to purchase of a property to qualify for landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)
- Pre-purchase business risk evaluation
- Evaluation of a property's regulatory compliance

BUYS & ASSOCIATES, INC.

SELECTED PHASE I PROJECTS:

Confidential Client: Texas

Buys & Associates conducted a Phase I ESA on approximately 80 sites comprising approximately 240 acres located in areas of limited access in Texas. The ESA was completed prior to purchase of these properties and was conducted in compliance with E1527-05 and AAI. Activities included site reconnaissance, interview with current and past owners and operators, environmental records reviews and historical records reviews. The ESA was completed in one month.

Confidential Client: Locations in Alabama, Louisiana, Mississippi & Texas

Buys & Associates team of professionals conducted an extensive Phase I ESA on seven gas plants comprising approximately 300 acres in Alabama, Louisiana, Mississippi and Texas. Activities included site reconnaissance, interview with current and past owners and operators, and historical and environmental record reviews. The ESA was completed in less than one month.

Confidential Client: Locations in Arkansas, Mississippi, New Mexico, Oklahoma & Texas

Buys & Associates conducted a Phase I ESA for a confidential client on approximately 315 sites comprising approximately 1,000 acres located in areas of limited access in the states of Arkansas, Louisiana, Mississippi, New Mexico, Oklahoma and Texas. The ESA was completed prior to purchase of these properties and was conducted in compliance with E1527-05 and AAI. Activities included site reconnaissance, interviews with current and past owners and operators, environmental records reviews and historical records reviews. The ESA was completed in one month.

Typical maintenance facility, with potential hazardous material storage in yard.

B&A PROFESSIONAL ESA TEAM:

Buys & Associates' employees meet the minimum qualifications for Environmental Professionals (EPs) as defined in CERCLA AAI, and are experienced and competent in completing ESAs following the American Society of Testing Materials (ASTM) Standard Practice for Environmental Site Assessments (E1527-05). Additionally, Buys & Associates' employees have extensive experience in conducting Phase I and Phase II ESAs under stringent time constraints, often in remote areas. In addition to our wide array of environmental, health and safety capabilities, Buys & Associates, Inc. can provide the necessary services to our clients to allow for the complete assessment of a property.
